

## *“Epigenetics of immunity: mechanisms and therapeutic opportunities”*

**DATE:** February 27, 2020  
9:00AM -5:30PM

**LOCATION:** RUBENSTEIN AUDITORIUM, SMILOW CENTER FOR TRANSLATIONAL RESEARCH, 3400 CIVIC CENTER BLVD., PHILADELPHIA, PA 19104

### Featured Keynotes:

**Jonathan Epstein, PhD**  
University of Pennsylvania

**Cornelis Murre, PhD**  
University of California, San Diego

**Daniel De Carvalho, PhD**  
University of Toronto

**Ellen Rothenberg, PhD**  
Caltech

**Alexander Rudensky, PhD**  
Memorial Sloan Kettering Cancer Center

Illustration of a functional T cell (background) and an exhausted T cell (foreground). When responding to chronic infection or cancer, T cells become exhausted and lose many of their core functions. This process involves a fundamental “rewiring” of the cellular regulation of gene expression. Thus, exhausted T cells likely represent a distinct cell lineage. See pages 1104, 1160, and 1165. Illustration: Valerie Altounian/Science

There will be a **Panel Discussion** immediately following with scientific editors from *Immunity*, *Cell*, and *Nature Immunology*....

**Funding for the Symposium has been provided by:**  
The Penn Institute for Immunology, The Penn Epigenetics Institute & the Immunobiology of Normal and Neoplastic Lymphocytes Training Grant

**SPEAKERS**
